

Place Value Game

Roll and record your numbers below:

A rainbow-shaped place value chart with a fox illustration at the top. The chart is divided into ten columns representing place values: millions, hundred thousands, ten thousands, thousands, hundreds, tens, ones, tenths, hundredths, and thousandths. Each column has a corresponding label written along the curve of the rainbow. There are two dots on the left side of the chart, indicating where to place a die.

A rainbow-shaped place value chart with an owl illustration at the top. The chart is divided into ten columns representing place values: millions, hundred thousands, ten thousands, thousands, hundreds, tens, ones, tenths, hundredths, and thousandths. Each column has a corresponding label written along the curve of the rainbow. There are two dots on the left side of the chart, indicating where to place a die.

A rainbow-shaped place value chart with a lion illustration at the top. The chart is divided into ten columns representing place values: millions, hundred thousands, ten thousands, thousands, hundreds, tens, ones, tenths, hundredths, and thousandths. Each column has a corresponding label written along the curve of the rainbow. There are two dots on the left side of the chart, indicating where to place a die.

A rainbow-shaped place value chart with a dragon illustration at the top. The chart is divided into ten columns representing place values: millions, hundred thousands, ten thousands, thousands, hundreds, tens, ones, tenths, hundredths, and thousandths. Each column has a corresponding label written along the curve of the rainbow. There are two dots on the left side of the chart, indicating where to place a die.

A rainbow-shaped place value chart with a penguin illustration at the top. The chart is divided into ten columns representing place values: millions, hundred thousands, ten thousands, thousands, hundreds, tens, ones, tenths, hundredths, and thousandths. Each column has a corresponding label written along the curve of the rainbow. There are two dots on the left side of the chart, indicating where to place a die.

A rainbow-shaped place value chart with a moose illustration at the top. The chart is divided into ten columns representing place values: millions, hundred thousands, ten thousands, thousands, hundreds, tens, ones, tenths, hundredths, and thousandths. Each column has a corresponding label written along the curve of the rainbow. There are two dots on the left side of the chart, indicating where to place a die.
