RAINBOW ROLL

millions • hundred thousands • ten thousands • thousands • hundreds • tens • ones • tenths • hundredths • thousandths • ten thousandths • hundred thousandths • millionths
Setup: 1+ Players. 1 Rainbow Roll Board per player. 1 die. (For best results use a 10 sided math-die with numbers 0-9). Laminate or place each Rainbow Roll Board into a page protector and use a dry erase marker to write.

Play: Take turns rolling the die and choosing where to place each number rolled. Once you place a digit you may not move it. Once all placements have been filled, the winner is the player who build the largest number on their board. Variations can include building the smallest number, or having one die roller and everyone placing the same numbers.
