

Instructions: Write out each division equation with 4 digits divided by 1 divisor and solve by finding the quotient with a remainder.

1.

$$3 \overline{) 6781}$$

2.

$$5 \overline{) 7854}$$

3.

$$6 \overline{) 3452}$$

4.

$$4 \overline{) 2347}$$

5.

$$5 \overline{) 2347}$$

6.

$$9 \overline{) 6731}$$

7.

$$3 \overline{) 2345}$$

8.

$$7 \overline{) 4569}$$

9.

$$7 \overline{) 5398}$$

10.

$$4 \overline{) 2190}$$

11.

$$6 \overline{) 2871}$$

12.

$$3 \overline{) 5483}$$

Instructions: Write out each division equation with 4 digits divided by 1 divisor and solve by finding the quotient with a remainder.

1.

$$\begin{array}{r} 2260 \text{ r}1 \\ 3 \overline{)6781} \end{array}$$

2.

$$\begin{array}{r} 1570 \text{ r}4 \\ 5 \overline{)7854} \end{array}$$

3.

$$\begin{array}{r} 575 \text{ r}2 \\ 6 \overline{)3452} \end{array}$$

4.

$$\begin{array}{r} 586 \text{ r}3 \\ 4 \overline{)2347} \end{array}$$

5.

$$\begin{array}{r} 469 \text{ r}2 \\ 5 \overline{)2347} \end{array}$$

6.

$$\begin{array}{r} 747 \text{ r}8 \\ 9 \overline{)6731} \end{array}$$

7.

$$\begin{array}{r} 781 \text{ r}2 \\ 3 \overline{)2345} \end{array}$$

8.

$$\begin{array}{r} 652 \text{ r}5 \\ 7 \overline{)4569} \end{array}$$

9.

$$\begin{array}{r} 771 \text{ r}7 \\ 7 \overline{)5398} \end{array}$$

10.

$$\begin{array}{r} 547 \text{ r}2 \\ 4 \overline{)2190} \end{array}$$

11.

$$\begin{array}{r} 478 \text{ r}3 \\ 6 \overline{)2871} \end{array}$$

12.

$$\begin{array}{r} 1827 \text{ r}2 \\ 3 \overline{)5483} \end{array}$$
