

Solve the multiplication word problems.

The teacher went to the library and borrowed 4 books a day. If she goes to the library for 6 days in a row, how many books did she borrow total?

$$\underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Callie has 5 jars. She puts 7 pieces of candy in each jar. How many pieces of candy is there altogether?

$$\underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Kara picked apples in an orchard. There were 8 trees in the orchard. Each tree had 4 apples on it. How many apples did Kara pick?

$$\underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Solve the multiplication word problems.

The teacher went to the library and borrowed 4 books a day. If she goes to the library for 6 days in a row, how many books did she borrow total?

$$\underline{\quad 4 \quad} \times \underline{\quad 6 \quad} = \underline{\quad 24 \quad}$$

Callie has 5 jars. She puts 7 pieces of candy in each jar. How many pieces of candy is there altogether?

$$\underline{\quad 5 \quad} \times \underline{\quad 7 \quad} = \underline{\quad 35 \quad}$$

Kara picked apples in an orchard. There were 8 trees in the orchard. Each tree had 4 apples on it. How many apples did Kara pick?

$$\underline{\quad 8 \quad} \times \underline{\quad 4 \quad} = \underline{\quad 32 \quad}$$
