

Ingredients:

Vanilla pudding mix
Chocolate pudding mix
Peanut butter chips &/or chocolate chips
Red, yellow and green food coloring
Shredded coconut

Directions:

Prepare the Pudding Layers:

Follow the instructions on the packages to prepare the vanilla and chocolate puddings separately.
Allow them to cool.

Coloring the Layers:

Divide the vanilla pudding into four equal parts.

Add red food coloring to one part, orange to another, and green to the third part and finally yellow to the last of the pudding. Mix each color thoroughly until you achieve the desired shades.

Mix the shredded coconut with a little bit of blue food coloring.

Creating the Layers:

Start by placing a layer of chocolate pudding at the bottom of a clear serving dish to represent the Earth's inner core.

Over the chocolate layer, spread the red-colored vanilla pudding for the outer core. Add the yellow-colored vanilla pudding on top to signify the mantle.

Adding Texture:

Sprinkle a handful of peanut butter and chocolate chips over the yellow layer to represent rocks and minerals within the mantle.

Crust and Surface:

Spread a thin layer of the green pudding to symbolize the crust. On top of the layers, sprinkle shredded coconut to symbolize the Earth's oceans.
