A Veterinarian

Veterinarians (Vets) are special helpers for our animals. They are like doctors, but for our pets like dogs and cats. Vets make sure our pets are healthy and happy. If our pets are sick or hurt, vets know just what to do to make them feel better. They give pets their check-ups, just like when you visit the doctor. Vets also teach us how to take care of our pets. We are lucky to have vets in our community to help us take keep our animals safe and sound.
