All About A Zookeeper

A zookeeper is a very important part of our community. They take care of the animals at the zoo, such as lions, elephants, and monkeys. Zookeepers make sure the animals have food to eat and clean water to drink. They also keep the animals' homes safe and clean. Zookeepers teach us about animals and show us how we can help look after them too. They work hard every day to keep the animals happy and healthy. We can learn a lot from zookeepers!
