

Butterflies vs. Bees

Name: _____

Date: _____

Choose a color for each type of fact below. Read the passage and highlight key facts as you go.

butterflies both bees 

Butterflies and bees are both insects that fly. They both have wings and six legs. Butterflies and bees visit flowers to drink nectar. Both help plants grow by spreading pollen. Butterflies have big, colorful wings, but bees have smaller, clear wings. Bees make a buzzing sound, while butterflies fly quietly. Butterflies have long tongues, but bees have shorter tongues. Some bees can sting, but butterflies cannot sting at all.
