dinosaurs

both

farm
animals

Dinosaurs and farm animals are both types of animals. They both lay eggs and have babies. Dinosaurs and farm animals both eat plants or meat. We can learn about them in books and movies. Dinosaurs lived long ago, but farm animals live today. Dinosaurs were often very big, while most farm animals are smaller. We only see dinosaur bones in museums, but we can visit live farm animals. Dinosaurs are extinct, but farm animals help give us food like eggs and milk.
