

# MATH VOCABULARY

## CONVERT

Change from one unit or form to another.

Example:  
1 meter =  
100 centimeters

## ESTIMATE

Find an answer that is close enough, not exact.

Example:  
Guessing that a jar holds about 5 cookies.

## CAPACITY

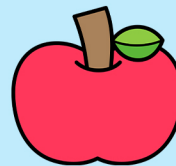

The amount a container can hold.

Example:  
A water bottle holds  
500 milliliters.

## MASS

The amount of matter in an object.

Example:  
An apple has a  
mass of 150 grams.

## LENGTH

The measurement of something from end to end.

Example:  
A pencil is  
15 centimeters long.

## VOLUME

The amount of space an object takes up.

Example:  
A box has a volume  
of 24 cubic inches.
