

ASK A QUESTION

Scientists start by being curious about the world around them! Your question should be specific enough to investigate, like asking "Will plants grow taller in sunlight or shade?" instead of "Why are plants green?"

EXAMPLE QUESTIONS

1. "Which paper towel brand absorbs the most water?"
2. "Do different types of music affect how fast my dog eats dinner?"
3. "Will ice melt faster in salt water or fresh water?"
4. "Does the temperature of water affect how fast sugar dissolves?"
5. "Which type of soil helps plants grow tallest?"
6. "Do plants grow better with tap water or rainwater?"
