

Solve each division problem. Show your work.

The librarian needs to put 56 books on 7 shelves. If each shelf gets the same number of books, how many books will be on each shelf?

$$\square \div \square = \square$$

There are 72 students going on a field trip. Each bus can hold 9 students. How many buses are needed?

$$\square \div \square = \square$$

A pizza is cut into 8 slices. If there are 48 slices total for the party, how many pizzas were ordered?

$$\square \div \square = \square$$

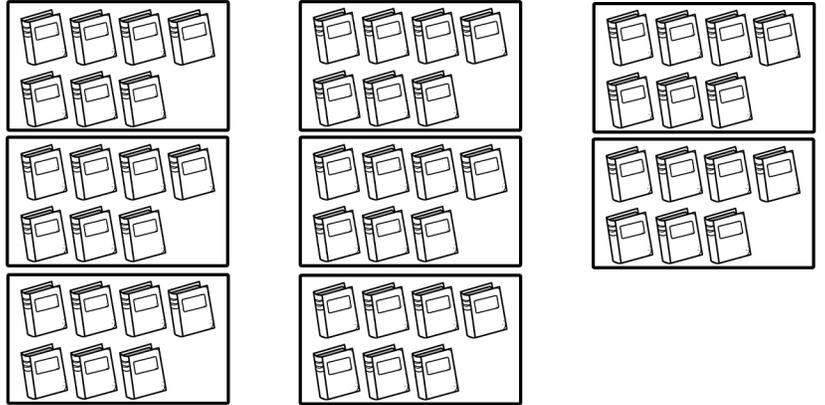

Four friends earned \$36 raking leaves together. If they split the money equally, how much does each friend get?

$$\square \div \square = \square$$

Solve each division problem. Show your work.

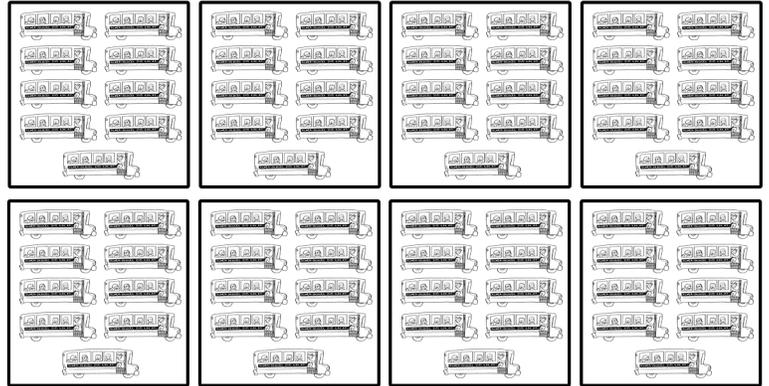

The librarian needs to put 56 books on 7 shelves. If each shelf gets the same number of books, how many books will be on each shelf?

$$\boxed{56} \div \boxed{7} = \boxed{8}$$

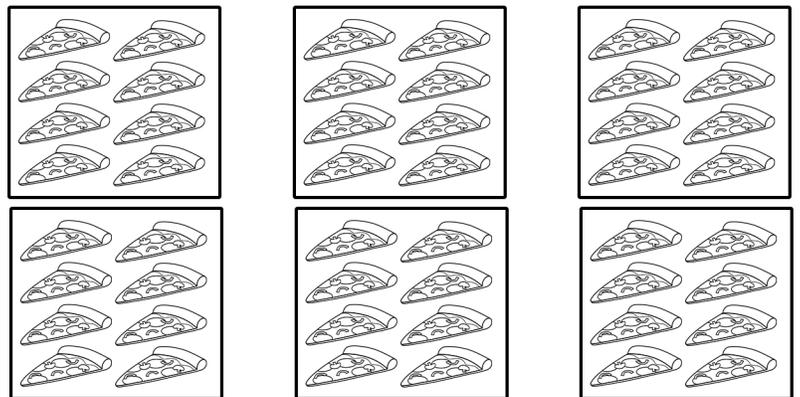

There are 72 students going on a field trip. Each bus can hold 9 students. How many buses are needed?

$$\boxed{72} \div \boxed{9} = \boxed{8}$$

A pizza is cut into 8 slices. If there are 48 slices total for the party, how many pizzas were ordered?

$$\boxed{48} \div \boxed{8} = \boxed{6}$$

Four friends earned \$36 raking leaves together. If they split the money equally, how much does each friend get?

$$\boxed{36} \div \boxed{4} = \boxed{9}$$
