

PARTS OF AN EVERGREEN TREE VOCABULARY CARDS

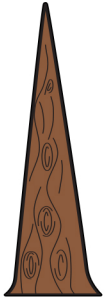

SUPERSTARWORKSHEETS.COM

roots

SUPERSTARWORKSHEETS.COM

The parts of the tree that grow underground. They soak up water and nutrients from the soil and anchor the tree in place.

SUPERSTARWORKSHEETS.COM

SUPERSTARWORKSHEETS.COM

trunk

SUPERSTARWORKSHEETS.COM

The tall, thick central stem of the tree. It supports all the branches and carries water and food to every part of the tree.

SUPERSTARWORKSHEETS.COM

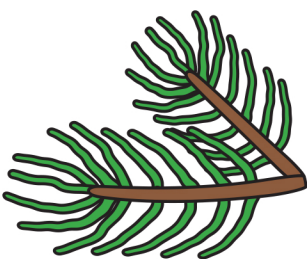

SUPERSTARWORKSHEETS.COM

bark

SUPERSTARWORKSHEETS.COM

The rough, scaly layer on the outside of the trunk and branches. It protects the tree and keeps moisture inside.

SUPERSTARWORKSHEETS.COM

SUPERSTARWORKSHEETS.COM

branches

SUPERSTARWORKSHEETS.COM

The long woody parts that grow out from the trunk and hold the needles and cones.

PARTS OF AN EVERGREEN TREE VOCABULARY CARDS

SUPERSTARWORKSHEETS.COM

needles

SUPERSTARWORKSHEETS.COM

The thin, pointed leaves of an evergreen tree. Needles stay on the tree all year and help the tree make food from sunlight.

SUPERSTARWORKSHEETS.COM

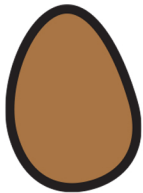

SUPERSTARWORKSHEETS.COM

cone

SUPERSTARWORKSHEETS.COM

The hard, woody structures that grow on an evergreen tree. Cones hold the seeds inside and protect them until they are ready to fall.

SUPERSTARWORKSHEETS.COM

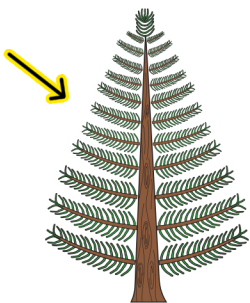

SUPERSTARWORKSHEETS.COM

seed

SUPERSTARWORKSHEETS.COM

The tiny plant starters that live inside the cones. When a cone opens, the seeds fall out and can grow into new trees.

SUPERSTARWORKSHEETS.COM

SUPERSTARWORKSHEETS.COM

crown

SUPERSTARWORKSHEETS.COM

The top part of a tree made up of the branches, twigs, and leaves.
