

PLANT NEEDS VOCABULARY CARDS

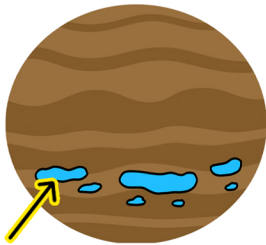

SUPERSTARWORKSHEETS.COM

sunlight

SUPERSTARWORKSHEETS.COM

Plants need sunlight to make their own food. Without sunlight, a plant cannot grow or stay healthy.

SUPERSTARWORKSHEETS.COM

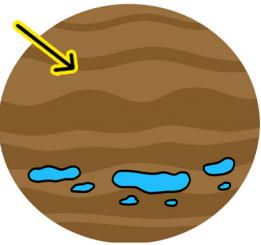

SUPERSTARWORKSHEETS.COM

water

SUPERSTARWORKSHEETS.COM

Water that travels up from the roots and is used to help make food.

SUPERSTARWORKSHEETS.COM

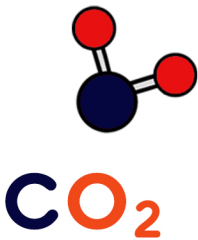

SUPERSTARWORKSHEETS.COM

soil

SUPERSTARWORKSHEETS.COM

Soil holds a plant in place and gives it nutrients — tiny bits of food that help it grow big and strong.

SUPERSTARWORKSHEETS.COM

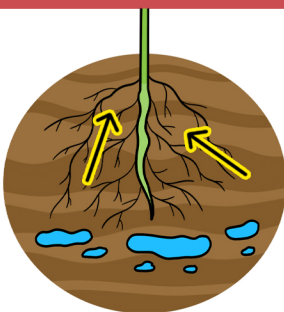

SUPERSTARWORKSHEETS.COM

air

SUPERSTARWORKSHEETS.COM

Plants need air to breathe and to make their own food. They take in a gas from the air called carbon dioxide.

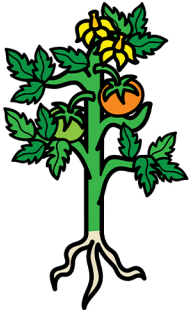

SUPERSTARWORKSHEETS.COM

space

Plants need enough space to spread their roots and leaves. Without space, plants cannot get enough light, water, or nutrients.

TOMATO LIFE CYCLE VOCABULARY CARDS

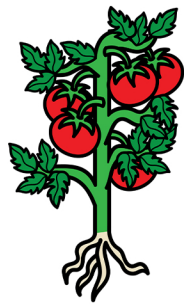

SUPERSTARWORKSHEETS.COM

young
plant

SUPERSTARWORKSHEETS.COM

A plant that is growing taller and making more leaves. It is not ready to make fruit yet, but it is getting there!

SUPERSTARWORKSHEETS.COM

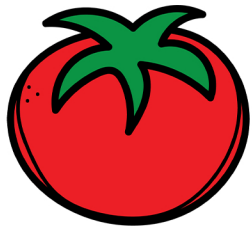

SUPERSTARWORKSHEETS.COM

mature
plant

SUPERSTARWORKSHEETS.COM

A full-grown tomato plant with lots of leaves and flowers. It is ready to be pollinated so it can make tomatoes!

SUPERSTARWORKSHEETS.COM

SUPERSTARWORKSHEETS.COM

tomato

SUPERSTARWORKSHEETS.COM

The fruit of the tomato plant! Inside the tomato are seeds that can fall to the ground and start the life cycle all over again.
