

FUN FACTS ABOUT LADYBUGS

SUPER SPECIES

There are more than 5,000 different species of ladybugs found all around the world.

BIG APPETITE

A single ladybug can eat up to 5,000 aphids in its lifetime.

SHORT LIFE

Most ladybugs live for about one year in the wild.

TINY BODYGUARDS

A ladybug's bright colors warn predators that it doesn't taste good, keeping it safe.

WORLD TRAVELERS

Ladybugs live on every continent except Antarctica.

NOT JUST RED

Ladybugs can be red, orange, yellow, pink, or even black, not just red with black spots.

SPOT COUNT

The number of spots on a ladybug can help tell what species it is.

QUICK FLIERS

Ladybugs can beat their wings up to 85 times per second when they fly.

SLEEPY SEASON

Ladybugs hibernate together in large groups during the winter to stay warm.

FARMERS' FRIEND

Farmers and gardeners release ladybugs into fields and gardens to protect crops naturally.
