

Draw a line to connect each word to its definition.

amphibian

The living material
that makes up
parts of an
animal's body.

metamorphosis

When an animal
keeps its young,
baby-like features
even after becoming
an adult.

neoteny

The ability of an
animal to grow back
a body part that
was lost or damaged.

regeneration

A type of animal
that usually lives part
of its life in water
and part on land.

tissue

The process where a
young animal's body
changes shape as it
grows into an adult.
