Frog vs. Toad

Name: _____

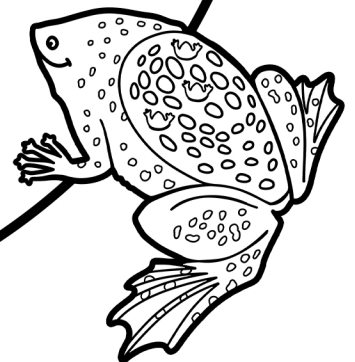

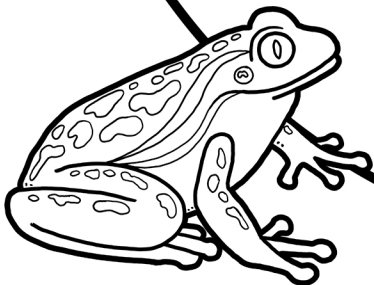

Date: _____

Write facts that are only true for frogs on the left, only true for toads on the right, and facts true for both in the middle.

Frog

smooth, moist
skin; long, strong
hind legs for
jumping; lives near
water most of
the time.

Both

are amphibians;
lay eggs in water;
go through
metamorphosis;
eat insects.

Toad

dry, warty skin;
short legs for
walking/hopping
short distances;
can live farther
from water.
