

EXCHANGE OF OXYGEN & CARBON DIOXIDE

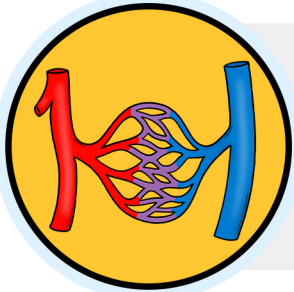

ALVEOLAR CAPILLARY NETWORK

A close-up of where
gas exchange happens.

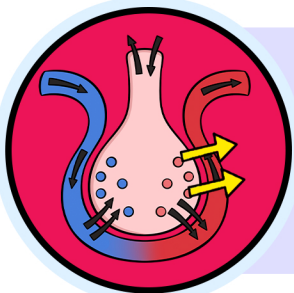

ALVEOLUS

Tiny air sac that fills with air from the
bronchioles.

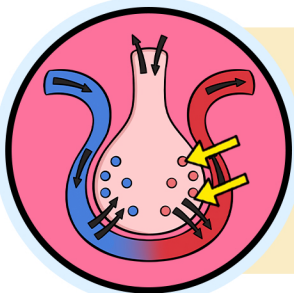

CAPILLARY

Thin blood vessel that wraps around
each alveolus.

OXYGEN IN

Oxygen passes from the alveolus
into the blood.

CARBON DIOXIDE OUT

Carbon dioxide passes from the blood
into the alveolus to be exhaled.
