

SEA TURTLE ADAPTATIONS VOCABULARY CARDS

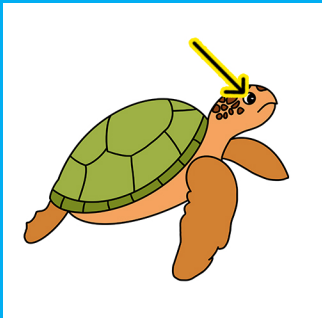

flippers

Paddle-shaped limbs shaped perfectly for pushing a turtle through the water.

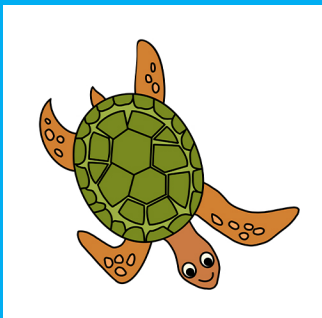

streamlined shell

A shell shaped smooth and curved so it moves easily through water with less drag.

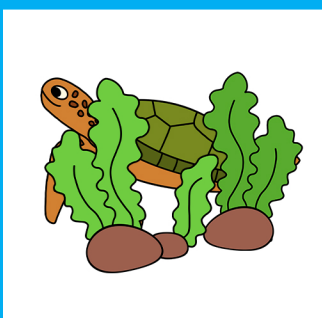

salt glands

Special parts near a turtle's eyes that release extra salt from the ocean water it swallows.

diving ability

A sea turtle's skill at holding its breath and swimming deep underwater.

camouflage

Coloring that helps a sea turtle blend in with its surroundings so predators have a harder time spotting it.
