

HUMAN BODY SYSTEMS

Skeletal System

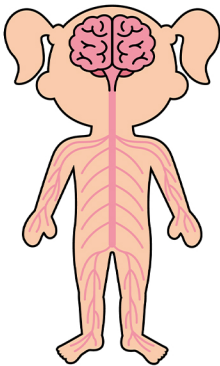

Your bones make up your skeleton. This is how your body stands up tall!

Muscular System

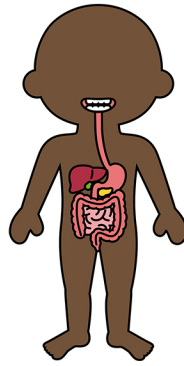

Your muscles help you move. This is how you run, jump, and wave!

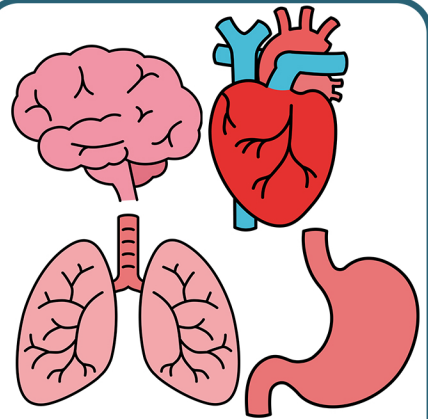

Nervous System

Your brain sends messages to your body. This is how your brain talks to your body!

Digestive System

Your body breaks down food for energy. This is how your body uses what you eat!

Major Organs

Your organs each have a special job inside your body.
