FUN FACTS ABOUT YOUR

FIVE SENSES

SPEEDY SNIFFER
A human nose can recognize thousands of different smells.

EAR POWER
Your ears never stop working, even while you are asleep.

BLINKING BREAK
You blink about 15 to 20 times every minute to help keep your eyes clean and moist.

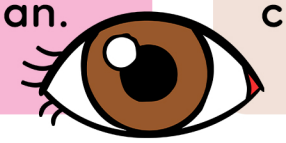

TASTE BUD TURNOVER
Your taste buds get replaced with new ones about every two weeks.

BRAINY TEAMWORK
Your senses send messages to your brain, and your brain puts them together to help you understand the world.

DOG NOSE CHAMPS
A dog's sense of smell is many times stronger than a human's sense of smell.

EAGLE EYES
Eagles can see much farther and more clearly than humans can.

SKIN, YOUR BIGGEST ORGAN
Skin is the largest organ in the human body and covers you from head to toe.

FINGERTIP FEELERS
Your fingertips have some of the most sensitive touch receptors on your whole body.

TASTE AND SMELL TEAM UP
Your sense of smell helps you notice flavors, which is why food can taste different when your nose is stuffy.
