TWO TRUTHS & A LIE: FIVE SENSES

Your pupil gets bigger in dim light.

You need light to see objects.

Humans have three eyes.

TWO TRUTHS & A LIE: FIVE SENSES

Your eardrum vibrates when sound reaches it.

Ears help you stay balanced as well as hear.

You can hear sounds better in outer space than on Earth.

TWO TRUTHS & A LIE: FIVE SENSES

Your nose has two nostrils.

Humans can smell better than dogs.

Smelling and tasting work together.

TWO TRUTHS & A LIE: FIVE SENSES

Your tongue is covered in taste buds.

Your tongue can only taste with the very tip.

Taste buds get replaced every couple of weeks.

TWO TRUTHS & A LIE: FIVE SENSES

Your skin cannot feel temperature, only pressure.

Skin is the largest organ in your body.

Your fingertips are extra sensitive to touch.

TWO TRUTHS & A LIE: FIVE SENSES

All five senses send messages to your brain.

Humans only use one sense at a time.

Animals like eagles and dogs can have stronger senses than humans in some ways.
