A CLOSER LOOK AT DIGESTIVE TRACT ORGANS

THE DIGESTIVE TRACT IS MADE UP OF:

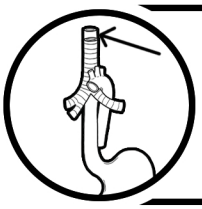

1. _____
2. _____
3. _____
4. _____
5. _____

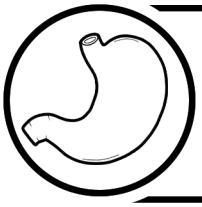

_____

Teeth grind food while the tongue mixes it with _____ . Amylase in saliva starts breaking down _____ , so digestion begins here before you even swallow.

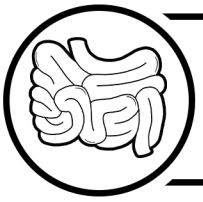

_____

This muscular tube connects the _____ to the stomach. Peristalsis pushes each _____ down, and the lower esophageal sphincter opens to let food into the stomach, then closes.

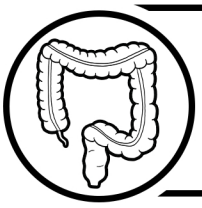

_____

Strong muscles churn food with _____ juice, which contains hydrochloric acid and pepsin. The food becomes _____ , and the pyloric sphincter lets it into the small intestine a little at a time.

_____

The _____ , jejunum, and ileum finish chemical digestion with help from bile and pancreatic juice. Millions of _____ absorb nutrients into the blood.

_____

Leftovers enter the cecum and move through the _____ , where water and salts are absorbed. The remaining _____ becomes feces, which is stored in the rectum until it leaves through the anus.

bolus	duodenum	Large Intestine	saliva	Stomach
chyme	Esophagus	Mouth	Small Intestine	villi
colon	gastric	pharynx	starches	waste
