A CLOSER LOOK AT
MUSCLE STRUCTURE

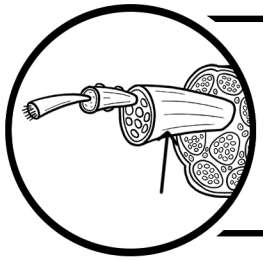

MUSCLE IS MADE UP OF:

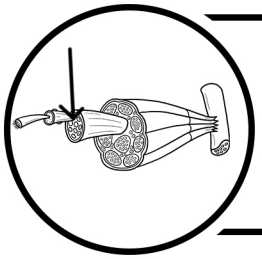

_____

A tough cord of _____ tissue that attaches muscle to _____. When the muscle contracts, the tendon pulls the bone.

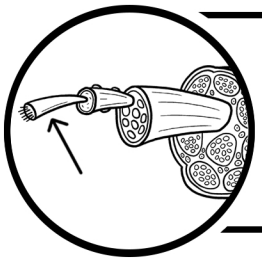

_____

A bundle of muscle _____ wrapped in connective tissue. Many fascicles _____ together form a whole muscle.

_____

A single long muscle _____. Groups of muscle fibers form _____ tissue, the tissue that lets muscles contract.

_____

Tiny _____ packed inside each muscle fiber. They shorten together to make the fiber _____.

bone	connective	fibers	Myofibril
bundled	contract	muscle	Tendon
cell	Fascicle	Muscle Fiber	threads
